## Technical Data Sheet

# RUST REMOVER

### Product Description:

Rust Remover is a blend of rust dissolving chemical, surfactant and passivate for the removal of loose rust and rust stains. The product also protects the surface from flash rusting for short interval before painting. It can also work as a brightener for non-ferrous metals.

### Applications:

- Test on small area
- Remove loose dirt, scale and rust from the surfaces by wire brushing
- Surface to be cleaned should be free from oil and grease
- For light rust & stains: Mix 1 part Rust Remover with 6 parts of water
- For Heavy loose rust & stains: Use undiluted or dilute as per requirement
- Apply solution to surface and wet thoroughly, allow dwelling 5 minutes and washing with fresh water
- Agitate with synthetic brush or Machine, if required
- Rinse thoroughly with clean water; do not allow to dry on the surface
- Can also be used as a soaking solution for parts. Heated water will enhance performance

### Available Sizes:

Available in 6,10,25 and 200 litres drum packing

### Safety:

- We advise the wearing of rubber gloves in case of prolonged contact with the skin.
- Refer appropriate MSDS before handling and use
