

Technical Data Sheet

ADICOR[®]-Solvent

Art.-No. 2 05563

Specially blended solvents for use with ADICOR-2K-PU

Description:

- Special blend of solvents.

Areas of application:

ADICOR-Solvent is a ready to use blend of solvents used as a cleaning agent for tools used in the mixing of ADICOR-2K-PU. It is also used as a diluent to adjust the viscosity of ADICOR-2K-PU.

Technical Data:

Basis:	various hydrocarbon solvents
Colours:	clear/amber
Flashpoint:	> +23 °C
Density:	approx. 0.87 g/cm ³ at +23 °C & RH 65%
Preparation:	ready to use
Packaging:	5 kg l metal can
System components:	ADICOR-Solvent is part of the ADICOR-PU system used in conjunction with ADICOR-1K-PU and ADICOR-2K-PU to aesthetically protect the elastomeric cementitious coatings AQUAFIN-2K and AQUAFINR-2K/M. Please refer to relevant technical data sheets & ensure use of ASO-Joint-Tape 2000 and ancillaries as appropriate for sealing of construction & expansion joints.

Storage:

Minimum 24 months when kept in original unopened packs packaging in well ventilated & dry conditions away from frost, elevated temperatures and direct sunlight. Tightly seal packs packaging if opened above.

Consumption:

Thinner:

Typically 53-8% by weight of ADICOR-2K-PU as required.

Cleaning agent:

As necessary.

Important advice:

- Please refer to the valid technical data sheets of the products!!

Please observe the valid EU safety data sheet.

GISCODE: M-VM04
